

Your Prescription Drug Program

Anywhere, Anytime Convenience

We offer a nationwide network of over 62,000 retail pharmacies and online prescription services. Visit our Web site for many easy-to-use tools and to register online to access the following online services:

- View your prescription history
- Research generic alternatives
- Look up copay information
- Find a local network pharmacy

Save Time and Money with Mail Service

If you use the same medication daily, then it is probably a maintenance medication. Mail service pharmacies like **Caremark Mail Service Pharmacy** are the best source for maintenance medication.

Maintenance medications are those prescription drugs that your doctor anticipates will be required for at least six months to treat a chronic condition such as arthritis, high cholesterol, depression, high blood pressure, diabetes and ulcers.

Remember!

- If you choose to use the Caremark Mail Service Pharmacy option, you will receive additional savings as well as up to a 90-day supply of your prescription.
- You will still receive discounts if you use a network pharmacy or the mail service option even **after** you have exhausted your calendar year benefits.
