

Health Insurance
meets Health **Assurance.**

THE LIFESTRIVE™ BLOOD TEST COULD SAVE YOUR LIFE!

Did you know that most **chronic and critical diseases** can be prevented through early detection of key biomarkers that predict these conditions? It's true, and now these tests are available through a wellness benefit built right inside of the Critical Illness Coverage choice you will be making during open enrollment this year. Best of all, it is **available at no additional charge!**

LifeStrive's Comprehensive Wellness Profile tests over 50 key biometrics of health including:

- Lipid panel (cholesterol, HDL, LDL, VLDL, risk ratio, triglycerides)
- Complete Blood Count (WBC, RBC, platelets, MCV, Differential & more)
- Fluids & Electrolytes (Na, Cl, K, CO2)
- Thyroid Panel (T4, T3Uptake, Free Thyroxine Index - T7, TSH)
- Liver Panel (ALT, AST, LDH, Bilirubin, GGT, Alk Phos)
- Protein Status (Total Protein, Albumin, Globulin)
- Kidney Panel (BUN, Creatinine, BUN/Cr Ratio, eGFR)
- Metabolism (Uric Acid)
- Glucose (Diabetes test)
- Mineral and Bone (Ca, PO4)
- Iron

When you choose the Critical Illness Coverage this year, you are not only **protecting yourself and your family from the overwhelming financial burden** that some diagnoses can bring, you are helping insure that you are aware of any potential health threats or risk factors so that this diagnosis never happens in the first place.

Simply assign the wellness benefit in your coverage to LifeStrive™ and your lab requisition form will be awaiting you upon activation. You will choose the most convenient lab location and proceed to complete the test. We will send your confidential results within 72 hours following the screening. Your results are COMPLETELY CONFIDENTIAL...we do not report them to anyone else but you!

You will also have the option to participate in health promotion programs designed to lower your risk of certain conditions once you review your results.

It's like getting an executive health profile every year, at no additional cost.
